INSIDE UNIT

EASY TO INSTALL

Ready to be installed, the Wine SP100 has a simple and quick plug-in system with two useful line lengths for connecting the outside and inside units: ■ SP100: 4.5 m ■ SP100-8: 8 m.

The outside unit, which is very quiet, can thus be moved further away from the inside unit, and set up outside the house; an ideal solution if the cellar is underground or if it is directly adjacent to the living space.
